Re: Toxicological Evaluation of Nature Print Paper;
ASTM D 4236-89

Dear Ms. Herrera:

You submitted your referenced product to me on March 4, 1991 for a Toxicological Evaluation per ASTM D 4236-89.

A complete evaluation was conducted and submitted with this certification in report form. The model utilized was a six year old child utilizing the product, which was the most conservative approach.

The product, Nature Print Paper, is basically a non-toxic product which will not cause any adverse health effects resulting from acute or chronic exposure. This product conforms to the health requirements of ASTM D 4236.

Respectively submitted,

William T. Lowry
